Cool. But then, don't forget to use David's NCDF\_FILE tool:

[http://www.idlcoyote.com/programs/ncdf\\_file\\_\\_define.pro](http://www.idlcoyote.com/programs/ncdf_file__define.pro)

And don't forget to set /NETCDF4\_FORMAT at the initialization of new files if you want to generate files greater than 2Gb

Cheers,

Fab
