> I am trying to create a customized axis that goes 9,10,11,12,1,2 (in accordance with September through February the next calendar year). Any suggestions?

```
IDL> t = timegen(6, start=Julday(9, 15, 2012), units='months')
IDL> void = label_date(date_format='%N')
IDL> cgplot, t, randomu(seed, 6), xtickformat='label_date', $
      xstyle=1, xticks=5
```

Cheers,

David
