

Subject: multiplot and /noerase

Hi!

I am a fairly new user of IDL, and I am trying to do the following:

```
!p.multi=[0,2,2]
contour,x,/fill,nlevels=10
contour,x,/downhill,nlevels=10,/noerase
```

where these two images are plotted on the same quadrant of the window. IDL disregards the /noerase on the second plot command and puts the second figure in the second quadrant. What am I doing wrong?

Thanx,

Martijn
