Subject: Re: high quality videos with idlffvideowrite? Posted by George.millward on Wed, 24 Apr 2013 23:09:24 GMT View Forum Message <> Reply to Message On Wednesday, April 24, 2013 3:07:42 PM UTC-6, george....@yahoo.com wrote: > Hi there, > > > Can anyone point me to some documentation on how to make a high quality > video with idlffvideowrite - I'm sure Exelis put one together - but, as is often the case, I can't find it. > > > > I can easily create videos with iflffvideowrite - but they are usually very horrible and compressed. I have replaced all of the ffmpeg .dll files as described in the reference manual and so I have lots of codecs and formats to work with... (I'm on windows7 btw) > > > ...but I never seem to get anything other than a really poor quality movie. Surely this can't be that hard ?!? > > Cheers > > > George. Andrew Thanks for your help. I was trying the presets - but i must have something wrong because 'lossless' was definitely still compressed. Here's what i have: vidStream = oVid.AddVideoStream(width, height, fps, codec='libx264', preset='slow') is that the correct codec for H.264?

Cheers

George.
