Dear all,

I'm still having trouble to get the Angstrom symbol to show up properly on the PS/PDF output using Device Fonts (!P.FONT=0). I can achieve that if I set !P.FONT=1 just before the text command (I'm using CGTEXT), but the output will be quite different from what I'm using throughout the paper.

If I try to use the lower case Angstrom, everything is just fine, as one can see in this figure:

[https://dl.dropboxusercontent.com/u/6573328/Angstrom_lowerca se.png](https://dl.dropboxusercontent.com/u/6573328/Angstrom_lowercase.png)

However, if I want to use the upper case Angstrom, which is the correct one, I think there is no room for the small circle to show up in the output for some reason that I don't know. See this figure:

[https://dl.dropboxusercontent.com/u/6573328/Angstrom_upperca se.png](https://dl.dropboxusercontent.com/u/6573328/Angstrom_uppercase.png)

Is there any way of setting the size of the text window?

Thank you.

m.
