Hi,

I have tried to run the idl environment "idlde" in ubuntu 12.04, but when i execute the command idlde I obtain this message:

```
/usr/local/itt/idl/bin/idlde: 609: exec: /usr/local/itt/idl706/idlde/idlde.linux.x86: not found
```

I have cheched and I have the file "idlde.linux.x86" in the same location "/usr/local/itt/idl706"

anyone have any idea?

thanks a lot!

Víctor
