Rob Klooster writes:

> I'm wondering if this just happens on Windows? Reason I ask is because I found an old
discussion on this group where something similar is happening:
https://groups.google.com/d/msg/comp.lang.idl-pvwave/6Y9pgAG Peyo/KbyZQ8Y4CY4J

I've never had any problems sending events on Windows machines. Several
of my most important programs (e.g., xcolors) use this functionality.

Cheers,

David
