Subject: MEAN function not working properly.

I am trying to use the mean function, in idl 8.1, with the NAN keyword. However, when I run it, it gives the error that the NAN keyword cannot be used with the mean function. I understand this was a problem before 7.1, and that it should not be happening in 8.1

I checked the mean.pro file, and it does in fact have the NAN keyword in it. Hve anyone run into this?
