Hi,

I've solved part of the problem insatalling the libraries ia32 (compatibility package 32 bits) but now I obtain this message:

JVM terminated. Exit code=13
/usr/lib/jvm/java-1.7.0-openjdk-amd64/bin/java
 -Dorg.eclipse.swt.browser.XULRunnerPath=/usr/local/itt/idl70
6/idlde/bin.linux.x86/xulrunner-1.8.1.3
-jar /usr/local/itt/idl706/idlde/plugins/org.eclipse.equinox.laun cher_1.0.0.v20070606.jar
-os linux
-ws gtk
-arch x86
-showsplash
-launcher /usr/local/itt/idl706/idlde/idlde.linux.x86
-name Idlde.linux.x86
--launcher.library /usr/local/itt/idl706/idlde/plugins/org.eclipse.equinox.laun
cher.gtk.linux.x86_1.0.0.v20070606/eclipse_1020.so
-startup /usr/local/itt/idl706/idlde/plugins/org.eclipse.equinox.laun cher_1.0.0.v20070606.jar
-exitdata 150003
-vm /usr/lib/jvm/java-1.7.0-openjdk-amd64/bin/java
-vmargs
 -Dorg.eclipse.swt.browser.XULRunnerPath=/usr/local/itt/idl70
6/idlde/bin.linux.x86/xulrunner-1.8.1.3
-jar /usr/local/itt/idl706/idlde/plugins/org.eclipse.equinox.laun cher_1.0.0.v20070606.jar

It seems that it is something with java and I 've tried to change the path on the file idlde.linux.x86.ini but I don't know the correct path of java..
