Hi all

Am reading a text file which consists of wind speed data, using read
ASCII macros. when i give a command:

```
array = data  
array = Reverse(array, 1)  
lat = Reverse(data.lat)
```

the following error is coming.

```
% ROTATE: Struct expression not allowed in this context: A.  
% Error occurred at: REVERSE
```

Same command when i run through IDL command prompt its working.
Please help me on this.

thank you
