Hi all,

I have another question about getting the "interval total" for a array.

For example, my array arr =

5.00800	2.00500	3.00600
1.00400	8.01100	3.00600
1.00400	2.00500	3.00600
