Here's an unofficial fix for the SVN plugin in IDL 8.2.3:

`ftp://download.exelisvis.com/groups/esg/dropoff/svn-plugin-fix-IDL823.zip`

This ZIP file holds two JAR files:

`org.eclipse.team.svn.core_1.0.0.I20121228-1700.jar`

`org.eclipse.team.svn.ui_1.0.0.I20130122-1700.jar`

Unzip the file and, with the Workbench closed, drop these jars into:

(Linux) `$IDL_DIR/idlde/plugins`

(Windows) `C:\Program Files\Exelis\IDL82\bin\bin.ARCH\plugins`

and the appropriate plugins directory on a Mac. (I don't have a Mac handy at the moment.) Start the Workbench and the SVN plugin should work correctly. I've tested this on Linux and Windows.

Somewhere along the way the ball got dropped, and (naturally) I was out of the office this week. The official hotfix should be out shortly; i.e., when I get back to the office and start tracking down people.

mp
