Subject: Re: Speeding up data crunching using IDL_IDLBridge with asychronous execution
Posted by natha on Thu, 11 Jul 2013 20:18:00 GMT

Hahahaha Are you one of the excelis guys? How is it possible that you have found something like that?...
I don't know if this is a final solution, because you may have several bridges running at the same time and you are destroying all the timers. I don't know how this thing would interfere with other bridges.

I think this is something to be tested...
