Subject: Filtering out NaNs

Posted by iarla on Wed, 19 Mar 1997 08:00:00 GMT

Hello,

There are some NaNs in my data which keep making my code fall over. I'd like to either filter them out or avoid them in the calculation, but doing something like

    a(where(a eq !values.f_nan) = missing_flag

doesn't work. Does anyone have any suggestions?

Many thanks,

Iarla.
