> I have an image with black background and would like to show the tick marks in white, and the labels in black.

```
image = BytArr(300, 300)
image[50,50] = Dist(200,200)
cgLoadct, 5
cgImage, image, /Axes, color='white', OPosition=p, /Fit_Inside
cgPlot, findgen(300), /NoData, /NoErase, Position=p, XStyle=4, YStyle=4
cgPlot, findgen(300), /NoData, /NoErase, Position=p, $
    XTicklen=0.0001, YTicklen=0.0001, XMinor=0, YMinor=0
END
```

Cheers,

David
