---

Respected sir,

I have to plot a 3d plot.

my xaxis is time which has (dblarr(807)), yaxis is latitude(intarr(16)), zaxis is the line width (dblarr(16,807)).

what I have to do is make butterfly diagram(sunspot butterfly diagram) from this.

Can anyone please help me how to do this.

thanking you in advance

sid
