Subject: Re: Automatic interpolation / smoothing in TV??
Posted by Jakob on Thu, 15 Aug 2013 13:02:34 GMT

Hi David,
thanks a lot for the answer.
Indeed, other programs show the right thing on plots generated with TV.
Meanwhile I had coded the same plot using the clumsy approach (loop over polyfill).
This does not trigger the blurring behavior in preview.
So it must have to do with the way the colored squares are described in the ps file and what
preview thinks it has to do to make it "look nice".
Anyway, that solves the question.
 Thanks,
  CJ
