I noticed this morning that the internal documentation seemed to be the same, but I didn't notice that the code was the same, too. Clearly some kind of cut and paste error. Unfortunately, I didn't have time to check it because my son has me going on bike rides every morning and today was our long one. It's getting harder and harder to keep up with the 20-something kids. :-)

I'll fix this and check it in soon. Thanks!

Cheers,

David
