Hi,

I seem to be having problems getting hyperhelp to work on Idl4.0 on Linux (2.0.29). All the other x apps seem to work - inside and outside idl. Here is the error message i get:

```
IDL> X Error: BadAtom
          Request Major code 18 ()
                AtomID 0x0
                    Error
```

Serial #452

Current Serial #467

The widget pops up instantaneously and then disappears followed by the appearance of that message in the idl window.

Any ideas??

Thanks in advance,

Bijan Pesaran
