If this is a one-off thing, I would copy-paste to e.g. Excel and save as comma-separated text. Then you can read that (openr, readf, etc): <http://www.exelisvis.com/docs/READ.html>

If this is something you'll need to do a lot (i.e. inefficient to manually convert to CSV each time), I am not sure, guess you would need to find out the MS Word file format somehow?

Andy
