Not the source code - just the instructions. I've had a few questions
about how to use the IMAGEMAP program, so I went ahead and created a
'Usage Tips' section on the IMAGEMAP web page at

http://cimss.ssec.wisc.edu/~gumley/imagemap.html

I've included some suggestions on how to get good results when using
low-resolution data like HIRS or MSU, and how to produce nice Postscript
output. I also added a couple of sample HIRS images produced by
IMAGEMAP.

Please let me know if you have any questions or comments.

Cheers,
Liam.
