Sorry for the confusion. I did check the sharing setting with no sign-in required in Google Drive but don't know what happened to prevent you from an easy view. Anyway, glad that you can see the plot now.

It would be helpful if you can also show me in your example how to adjust the viewing angle. That is, it would be great if I can generate a 3-D plot viewed from the North Pole, or from the Sun.

Many thanks!

-Mike
