AMS writes:

> Right, I agree in principle, but sometimes you want to take images from different sources and warp them to a common map projection to make a direct comparison. And if there is a map_image function in IDL, one would hope that it would work in a manner similar to intuition and/or the documentation.

Ah, not a computer scientist, I see. ;-)

Yes, we all have hopes and dreams that are sometimes dashed on the shoals of reality. "Get used to disappointment," is still the best advice I can offer.

Cheers,

David
