Hi,

I'm a little confused by the following:

```
IDL> print, 1200 MOD 0.1
```

```
0.0999821
```

```
IDL> print, (1200 * 10.0) MOD (0.1 * 10)
```

```
0.00000
```

I expected this to be 0 either way. What am I missing?

Thanks,

Seb
