```

My guess would be using an outdated Coyote Library. There is no gray scale coloring when I run your example. I follow these steps to resolve these kinds of issues:

http://www.idlcoyote.com/code_tips/fixcoyoteprogram.php

> 2. How can I add a color bar associated with the intensity (I)?

I think I would use cgColorbar. Did this *not* work for some reason?

Cheers,

David
