Hi Tim,

Well, we were really hoping to have it out by Cyber Monday to pick up all of those sales, but it looks like the actual date will be around Dec 16. So, you can plan on picking up a few copies as stocking stuffers.

And yes, IDL-67311 (IDL restores IDL .sav files much slower than Python) is fixed. Restoring save files should now be approximately the same speed in IDL compared to Python.

Cheers,
Chris
