I was playing with almost all keywords basing on the descriptions for `cgMap_Set`, `chMap_Grid`, `cgColorbar` and still unable to understand properly what I am doing wrong in my figure?

I put a new example program in the Coyote Gallery today that shows you how to create multiple plots, each plot with its own annotations, such as color bars. You can find it here:

[http://www.idlcoyote.com/gallery/index.html#MULTIANNOTATE\\_PLOT](http://www.idlcoyote.com/gallery/index.html#MULTIANNOTATE_PLOT)

Time spent answering question and creating a new gallery plot: 2.5 hours. Donations so far this month: \$350.

Cheers,

David
