Subject: Clipping shade_surf
Posted by e.grono on Thu, 19 Dec 2013 15:49:24 GMT

I'm running IDL 8.2.0 and have been finding it impossible to successfully use the clip keyword with shade_surf despite the fact the IDL documentation says it should work. No error messages are displayed, the plot just appears without any clipping done. Surface can be clipped successfully so it shouldn't be my use of the keyword causing trouble. Anyone have any experience with this issue?
