Hi

I am using image function graphic. I want to achieve the effect of

`cgimage,2d_array, missing_value=0,missing_color='white'`

in image function. How do I do that?

I tried

`img = IMAGE(rcounts, RGB_TABLE=33, TITLE=TTITLE,min_value=0)` but it does not work.

Second I do I make the size of plotted image bigger so that it looks similar to what i get when i plot using cgimage.

This makes the color of missing values white.

Gompie.
