help, PM25_TOTAL.reports_GOOD[good_val_pm25].time_JS_GOOD
<Expression>   DOUBLE   = Array[719, 5]

This is still not correct though. It was an array that had 144 measurements (one every 10 minutes - 24 x 6) for each of the 5 days of data. Now it has 719 measurements for each of the five days, when it should really have 719 over the whole 5 days combined.

Troy
