> For eg, out of the 10 structure instances, domain[2], domain[6],domain[7] are the empty ones and needs to be deleted and the final result should have only 7 elements in the structure array.

If you already know the structures you want to keep, you can just pick them out...

```
IDL> domain = REPLICATE({frame :0, particles : fltarr(5,6000),link : [-1,-1]}, 10)
IDL> iKeep = [0,1,3,4,5,8,9]
IDL> domain = domain[iKeep]
IDL> Help, domain
```
