Hello,

I am trying to plot graphs in cgwindow command using cgplot with a loop inside it, its not working fine a black window is coming.

When I am running the loop just with cgplot with mouse.button command its working fine, but when i gave cgwindow in front then its showing everytime different window for each plot.

my commands are

```
> for i = 0, a-1 do begin
>   cgwindow, 'cgplot', air_m, chn[i,*], color='blue', psym=1, thick=3, title = 'plot', xtitle='air mass',
ytitle = 'channels', xrange=[0,10], charsize=1.5

>   cursor, x, y, /up
>   while (!mouse.button eq 4) do begin
>     retall
>   endwhile
> endfor
```

i want to plot inside cgwindow and with mouse click next plot should come in same window.
How to do that please explain.

Thank You.
