Thanks for the response, but what I'm getting is 8 columns by 6000. The problem is that the data keeps on getting layered by row instead of column. Each column needs it's own set of data, below is what I want where one column contains 1's data, the second contains 2's...

1-2-3-4

1-2-3-4

1-2-3-4

1-2-3-4

1-2-3-4

Instead I get:

1-1-1-1

1-2-2-2

2-2-3-3

3-3-3-4

4-4-4-4

Does that make sense?
