
Subject: running main file from batch script ... in a loop

I was trying to run a main file from within a batch script. I have run it simply from the file, and it works, but if I try to call it from within a loop cycle I get a syntax error.

I do something like this:

```
n=10
for i=0, n do begin $
& .run main.pro $
& endfor
```

and main.pro can be something as easy as this:

```
print, 'hello'
end
```
