Dear All,

When I try to use eps format of ps_start in LaTex, the figure will rotate 90 degree, why this happen? and how I could solve it?

example:

```
IDL> ps_start,'Fig1.eps'  
IDL> cgplot,dist(11),color='red',psym=4  
IDL> ps_end
```

in Latex:

```
\includegraphics[scale=0.3]{Fig1.eps}
```

Thanks,
