Federico Tosi writes:

> I am using Coyote's cgBarPlot to plot some vertical bars, but I'm having hard times to shift the bars of a given quantity in the horizontal direction. The BAROFFSET parameter does not do the job, because I need the bars not to be centered on a thick (i.e., I need to change their X coordinate), while BARCOORDS is an output parameter.

The easiest way is probably just to draw the darn things yourself. But,
I really don't understand what you are trying to do. :-)

Cheers,

David
