Subject: cgGallery with function graphics
Posted by Matthew Argall on Thu, 27 Feb 2014 14:46:06 GMT

Hi, all,

I thought I would create a thread with examples from the coyote gallery reproduced with function graphics. It is sort of my learning process. I will also include comments regarding some of the non-intuitiveness / problems (bugs?) that I am running into as I try to use function graphics more.

I will post each reproduction as a reply to this, and will dredge up the thread in the future when if I get around to creating more. Feel free to do the same. Also, comments and fixes are welcome.

http://www.idlcoyote.com/gallery/

For good measure
