Subject: Re: Error with cg output and ImageMagick
Posted by BLesht on Fri, 28 Feb 2014 01:47:55 GMT

Quick update - Someone on the ImageMagick forum suggested that perhaps IDL "has" (or points to) its own versions of some of the delegate libraries (e.g. gslib, zlib, libpng) that are needed by ImageMagick and there may be a conflict between versions. This seems possible (to me). I just entered a formal support request to Exelis (as opposed to a forum posting) asking if they could assist with the problem.   Barry
