Subject: IMSL/IDL X-windowing Resource Editor?
Posted by btbg1194 on Sat, 03 Apr 1993 22:24:48 GMT

Is there the equivalent to a "resource" editor for creating X applications
for IMSL/IDL? Something that either writes some widget description or
widget handling code for you based on a user interface that you create by
pointing and clicking.

Thanks in advance for responses, suggestions and comments.
