```
IDL> print,CV_Coord(FROM_RECT=replicate(!values.F_NAN,3),/TO_SPHERE)  
      0.000000    0.000000      NaN
```

Should not the result rather be (NaN,NaN,NaN) ?
alx.

```
{ x86_64 Win32 Windows Microsoft Windows 8.3 Nov 15 2013    64    64}
```
