Could be similar to the problem I had with ImageMagick. IDL packages its own version of zlib. Once I moved the pointer from IDL's version to ImageMagick's version, everything worked. I do not see an entry for gs, but perhaps there is one in 8.3.

On my Mac I had to change

 /Applications/exelis/idl82/bin/bin.darwin.x86_64l/ibz.1.dyli b -> libz.1.2.3.dylib

to

 /Applications/exelis/idl82/bin/bin.darwin.x86_64/libz.1.dyli b -> /opt/local/lib/libz.1.2.8.dylib

I do see
 /Applications/exelis/idl82/bin/bin.darwin.x86_64/idl_jpeg.so
