MODIS products for atmospheres, oceans, and land have a variety of different gridding formats
and conventions so the answer is likely to be (to an extent) dataset-specific.

gridded product? I'm trying to avoid converting the images to geotiff so is it possible to do it for an
HDF file? Thanks.

Hi Andy, I'm looking at surface reflectance (MOD09GQ), land surface temperature and vegetation
indices. They're gridded to a sinusoidal projection.
