Thanks for the feed back. I will review all of this and hope my solution is there. I am not a idl programmer (but will have to figure it out) I was tasked to port this code over from a HPUX platform (circa 1995) with wave 7.5 (where it works)to a new redhat linux platform with wave 10.0... where it doesn't. This is a large code with NO comments. But, now I know where to start looking. Thank you again.
