Hey David, I think there is something funky going on with the axis color. I did

```
loadct,0  
im=cgdemodata(4)  
x=findgen(256)  
cgimage, im,/axis
```

and

```
cgimage, im,/axis, xv=x,yv=v
```

and in both cases the color of the axis is either white or something different.

Cheers,
Petros
