
Subject: How to control the lat-lon axis when using Google Static map as background?

Hello,

I am trying to overlay some points on a google static map as background. I find a problem with the y-axis labels. I see 51.52, 51.52, 51.53, 51.54, 51.54 (repetitive values!!!) while for x-axis they are 12.91,12.92,12.93,12.94,12.95

Why I am getting these repetitive labels on the y-axis? Is there a way to control these axis labels? Can I provide the values I want to see on the labels?

Also, can anyone help me in putting a bar which indicates km scale along x-axis and y-axis?

Below is the code I am using:

PRO test_GooglePlot

CLOSE,/ALL

```
Lats=[51.51D,51.55D] ; deg.N
Lons=[12.91D,12.95D] ; deg E
centerLat=(MAX(Lats) + MIN(Lats)) / 2.0 ; deg. N
centerLon=(MAX(Lons) + MIN(Lons)) / 2.0 ; deg. E
```

```
zoom=14
scale=cgGoogle_MetersPerPixel(zoom)
xsize= 600 < 640 ; Max size of Google image with this Google API
ysize= 600 < 640 ; Max size of Google image with this Google API
resolution = STRTRIM(xsize,2) + 'x' + STRTRIM(ysize,2)
```

```
googleImageFilename='testgoogleimg.png'
```

```
googleStr="http://maps.googleapis.com/maps/api/staticmap?" + $
"center=" + StrTrim(centerLat,2) + ',' + StrTrim(centerLon,2) + $
"&zoom=" + StrTrim(zoom,2) + "&size=" + resolution + $
" &scale=2&maptype=satellite&sensor=true&format=png32 "
```

```
netObject = Obj_New('IDLnetURL')
void = netObject -> Get(URL=googleStr, FILENAME=googleImageFilename)
Obj_Destroy, netObject
googleImage = Read_Image(googleImageFilename)
```

```
mapCoord = Obj_New('cgMap', 'Mercator', ELLIPSOID='WGS 84') ; ,/OnImage
uv = mapCoord -> Forward(centerLon, centerLat)
```

```
uv_xcenter = uv[0,0]
uv_ycenter = uv[1,0]
xrange = [uv_xcenter - (xsize/2.0D*scale), uv_xcenter + (xsize/2.0D*scale)]
yrange = [uv_ycenter - (ysize/2.0D*scale), uv_ycenter + (ysize/2.0D*scale)]
mapCoord -> SetProperty, XRange=xrange, YRange=yrange
PRINT, xrange, yrange
```

```
geo_lat=[51.5256, 51.5290, 51.5296, 51.5261, 51.5269, 51.5250, 51.5256, $
