This code draws a point. If that is what you are trying to do, then I
would use the PSYM keyword to add a symbol to the point:

   cgPlots, xlocation, stats.mean, PSYM=16, Color='red', Symsize=3

If you are trying to draw a line, then you will have to make the line a
bit longer than a single point to see it well:

   cgPlots, [xlocation, xlocation], [0,stats.mean], COLOR='red'

Cheers,

David
