Subject: Re: H5D_Read on compound type (GDL)
Posted by rjp23 on Thu, 24 Apr 2014 18:20:11 GMT

Hi Mark,

Thanks for testing it. I can get it to work fine in IDL but GDL fails. I've submitted a GDL bug support but that doesn't help for now.

I wondered if there was another way to read it in that avoided using h5d_read? I'm hoping to avoid a messy solution like using python to read it in and writing that to a file that GDL can then read but I'm not sure what other options I have.

Any help appreciated.

Cheers

Rob
