Subject: Full page plot in postcript
Posted by mariand on Fri, 25 Apr 2014 15:57:04 GMT

Hi,

I am using multiplot to create plots depicting various parameters in the same time interval. Since i have many panels, I would like my plot to occupy the full page in my postscript file and not only the fixed window size provided by idl.
Which keywords do I use to change this?

Thanks a lot.
Mariand
