Subject: overplotting hatching
Posted by Jeff Hicke on Tue, 06 May 1997 07:00:00 GMT

Hello,

I'd like to overplot hatching on a 2D contour plot. I would have
thought that I could use contour again, with the c_orientation and over
keywords set. However, apparently I need the cell_fill keyword to
create the proper contours, and thus the overplotting contour call wipes
out my original contour plot.

Does anyone know of a way to do this or has code?

Thanks in advance,
Jeff Hicke
