Hi Fabien,
First of all, thank you very much for replying me.
Yes, I thought at the beginning to use write_csv but I do not how to write the code, could you help me please?. It should be something like....

```
capri_clc1990 = [[long(arableCLC90s)], [long(arableCAPRI1990s)], [long(PC_CLC90s)]  
capri_clc2000 = [[long(arableCLC00s)], [long(arableCAPRI2000s)], [long(PC_CLC00s)]
```

```
csv_CLC_CAPRI= odir + country + '_CLC_CAPRI90.csv'  ***file name
```

```
write_csv, csv_CLC_CAPRI, ***** I do not what to write he...
```

Thank you very much.
Carolina
